

**Prof. Gunnar Landgren
Vice President of KTH
Interim CEO EIT ICT Labs**

Prof. Gunnar Landgren has a background in university and science management at KTH since 1995; initially as Head of the Electrum Laboratory, later as Vice president in charge of the KTH Kista Campus development during 1998-2004 - a part of the innovation driven public –private partnership "Kista Science City" creating one of the world's most dynamic ICT-hotspots.

Since 2005, he is Vice President with responsibility for Centers of Excellence, research infrastructure and European programmes serving all parts of KTH. He is currently leading EIT ICT Labs, one of the three KICs selected by the EIT as priority instruments towards a better integration within the Knowledge Triangle in Europe. Prof. Gunnar Landgren has a background in Semiconductor materials and technology at research institutes and since 1993 as professor at KTH.

He has taken special interest in optoelectronics and he is co-author of more than 100 scientific publications.
