

## **Open Call for Tender No OC/004/2012/EIT PROC Provision of digital telecommunications services**

Below, a list of the questions received for this procedure and the answers provided by the EIT:

### **Question 30**

According to your call for tender you ask for the respective project volume per project listed within our reference list. Due to our secrecy agreements we are not allowed to publish those figures. As solution we would state the project days instead as a possible criterion.

Would that be a suitable solution for you?

### **Answer to question 30**

Yes, it is a possible solution. The EIT will accept man/days as an indicator of the volume of the project.
