The European Institute of Innovation and Technology (EIT) is an EU body created by the European Union in 2008 to strengthen Europe’s ability to innovate. The EIT is an integral part of Horizon 2020, the EU’s Framework Programme for Research and Innovation.

What does the EIT do?

The Institute is a unique EU initiative that drives innovation across Europe by integrating business, education and research to find solutions to pressing global challenges.

We support the development of dynamic, long-term pan-European partnerships among leading companies, research labs and companies. These are called Innovation Communities and each is dedicated to finding solutions to a specific global challenge, from climate change and sustainable energy to healthy living and food.

Bringing together more than 1,000 partners, the EIT is Europe’s largest innovation network and connects the dots. We power innovators and entrepreneurs across Europe to turn their best ideas into products, services, jobs and growth. This is crucial to fulfilling the EIT’s mission: creating jobs and delivering sustainable economic growth opportunities for Europe. Together with leading partners, the EIT Community offers a wide range of innovation and entrepreneurship activities: education courses that combine technical and entrepreneurial skills, tailored business creation and acceleration services and innovation driven research projects. This brings new ideas and solutions to the market, turns students into entrepreneurs and, most importantly, delivers innovation.

Results

Since the EIT was set up in 2008, it has created the largest innovation community in Europe. The EIT’s model has been tried, tested and proven and has delivered:

- 8 thriving Innovation Communities
- 50+ innovation hubs across Europe
- 1,250+ start-up and scale-ups supported
- EUR 890+ million in external capital raised by our supported ventures
- 6,100+ jobs created
- 1,700+ Master and PhD graduates educated, with 5,000+ predicted by the end of 2020
- 640+ new products and services created
The EIT Regional Innovation Scheme (EIT RIS) is an outreach programme to help more organisations across Europe benefit from the EIT Community’s work and participate in its activities. The EIT RIS aims to increase the ability to innovate of European regions not yet working with the EIT and its Innovation Communities. The EIT RIS brings companies, universities, research labs and stakeholder organisations into Europe’s largest innovation community.

How can I get involved?

As part of an Innovation Community, access new partners, facilities, disciplines, industries and cultures. There are many opportunities to join the EIT Community and its wide range of innovation support activities across Europe: training and education programmes, innovation projects, business incubators and accelerators.

How can I stay up to date on the latest EIT Community news and opportunities?

Just follow the EIT on social media and subscribe to our newsletter.
